

Yellow PIG Day

Yellow Pig Day started in the 1960's when two college mathematicians decided to celebrate and study the number 17 on July 17th. They created a yellow pig with 17 toes, 17 eyelashes, 17 teeth, etc.. Solve these problems. Show your work

<p>Add up the first four prime numbers:</p>	<p>What is 17% of 70?</p>	<p>$(17 + 17) + 17 - 17 =$</p>
<p>$17 - 1.7 - .17 =$</p>	<p>Make up your own math problem including the number 17:</p>	<p>Draw a heptadecagon (a 17-sided figure)</p>
<p>Draw your own yellow pig with as many 17s as possible!</p>
